Maintenance Measures on Cavern Site

EKB Carries out Routine Works

Bremen, September 8, 2025: the Etzel-Kavernenbetriebsgesellschaft (EKB) carries out the routinely maintenance works from September 12 till September 28, 2025.

During this time the facility will be switched off.

These works may lead to increased noise emission. Furthermore, works may be required on Sundays and the use of additional lighting may be necessary. In the interest of respecting our neighbours, we will do our best to minimise light and noise pollution.

The regulating authorities have been informed about the maintenance works.

Company Information:

EKB Storage is a joint venture and operates a natural gas cavern storage facility in Etzel, East Frisia (municipality of Friedeburg, near Wilhelmshaven). This facility, operated by EKB Storage, currently has nine underground caverns in operation and is one of the most efficient commercial storage facilities in Germany: 450,000 cubic meters of natural gas can be injected and 800,000 cubic meters withdrawn per hour.
